SKILLS

- JavaScript
- Cypress
- Playwright (TypeScript)
- MongoDB, PostgreSQL
- Manual Testing

TOOLS

- Jira
- AIO Test Management
- Github / Gitlab
- k6
- Postman / Insomnia
- Grafana / Datadog

LANGUAGES

- Nepali
- English
- Hindi

PROFILE

QA Automation Engineer with 2 years of experience designing and maintaining test automation frameworks using Cypress and Playwright to strengthen release confidence and product quality. Skilled in API validation, database integrity testing, and third-party integration testing for SaaS products. Experienced in using Grafana and Datadog for proactive production monitoring, and in maintaining CI/CD-integrated test suites in collaboration with cross-functional product teams.

WORK EXPERIENCE

Matat Web Technologies

JUL 2026 - PRESENT

QA Automation Engineer

- Automated end-to-end testing of Shopify storefronts and web applications using Cypress and Playwright, ensuring reliable coverage across critical customer-facing flows.
- Built and maintained API automation test suites for POS (Point of Sale) systems, validating transaction processing, payment workflows, and third-party integrations.
- Performed data QA across databases to verify data integrity, accuracy, and consistency between Shopify, POS, and backend systems.
- Executed manual QA, including functional, regression, and exploratory testing, for new features and releases across Shopify apps.
- Managed test case documentation and defect tracking, ensuring clear traceability from requirement through to release.
- Collaborated with developers and product teams to validate fixes and ensure smooth, high-quality releases across Shopify and POS platforms.

Codavatar Tech Pvt. Ltd

JUN 2025 - JUL 2026

QA Automation & Manual Testing Engineer

- Validated UI against Figma designs and used CSSViewer and Ruler tools to ensure pixel-perfect layouts, improving design consistency and user experience.
- Performed REST API testing using Postman and Insomnia and validated API documentation via Swagger, enabling early detection of backend issues and improving API reliability.

- Conducted database validation to verify data integrity, correct transactions, and accurate storage across PostgreSQL and MongoDB systems.
- Reported and tracked defects using Jira and managed structured test cases in AIO, improving defect visibility, traceability, and test coverage.
- Monitored API logs and system performance using Grafana and Datadog, enabling proactive issue detection and reducing production troubleshooting time.
- Developed automation test scripts using Cypress and utilized Cypress Cloud for reporting, reducing manual testing effort by 30% and improving regression efficiency.
- Implemented automation using Playwright to overcome Cypress limitations, enabling multi-tab and cross-browser testing with TypeScript support, and reducing manual effort by 35%.
- Integrated automated test execution within CI/CD pipelines, ensuring faster feedback, improved release quality, and consistent test execution across deployments.

Silicon Bit Technology

NOV 2023 – MAR 2025

QA Automation & Manual Testing Engineer

- Executed comprehensive manual testing including functional, regression, and exploratory testing, ensuring early defect detection and improved product stability before release.
- Performed API testing using Postman to validate endpoints, request/response data, and business workflows, helping identify backend inconsistencies at early stages.
- Developed and maintained automation test scripts using Cypress for critical user flows, reducing repetitive manual effort and improving regression testing efficiency.
- Identified, documented, and tracked defects using Jira with clear reproduction steps, improving communication with developers and reducing bug resolution time.
- Collaborated closely with developers and product teams during testing cycles to validate fixes, perform re-testing, and ensure smooth and high-quality releases.

EDUCATION

Butwal Multiple Campus

2019 – 2024

BSc. CSIT

PERSONAL PROJECTS

CSV-Header-Mapping – (PHP)

- Built a PHP web app that enables users to upload, modify, and download CSV files with custom column headers.
- Demonstrated skills in file handling, data manipulation, and creating a user-friendly interface for seamless interaction.

Monthly Task Scheduler - (MERN)

- Developed a full-stack monthly task scheduler using HTML, CSS, Javascript, Node.js, and MySQL with support for CRUD operations and task notifications.
- Showcased strong skills in backend integration, user interaction, and task management features.

CampusHub - (MERN)

- Developed a dynamic backend with REST APIs supporting classroom creation, assignment uploads, and secure user authentication using Passport.js and JWT.
- Integrated real-time messaging via Socket.io and email verification using NodeMailer with OTP.
- Implemented plagiarism detection using the Knuth-Morris-Pratt (KMP) algorithm with adjustable matching thresholds.

Collaborative Real-Time Text Editor - (Node, HTML, CSS, JS)

- Developed a real-time collaborative text editor using Node.js, Socket.io, and vanilla JS, enabling multiple users to edit shared text simultaneously.
- Implemented edit request handling and live synchronization for seamless multi-user collaboration.
